FEDRIGONI PAPER

SPLENDORGEL AVORIO

lvory shade ultra-fine papers and boards with a very smooth and velvety surface. Clear look-through. Made of pure E.C.F. pulp certify FSC. Excellent opacity and even surface. Characteristics provide perfect on-press performance, excellent ink-yield and brilliant printed results. Substances over 230g are on-machine laminated in the formation stage.

ECOLOGICAL FEATURES

SPLENDORGEL AVORIO

Splendorgel Avorio is excellent for packaging, coordinated graphic materials, labels, covers, envelopes, calendars, note-books, editions, inserts, soft covers.

Can be used without problems with the main printing systems: letterpress, offset, blind embossing, hot foil stamping, thermography and screen printing. The macro-porous surface suggests the use of oxidative drying inks. Good chromatic and tone performance, ink load, dot gain and printing contrast are at the highest levels

obtainable from uncoated papers.

folding and glueing.

Varnishing and plastic laminating must be assessed in advance. The varnishing coated with an offset machine is almost fully absorbed and therefore does not improve gloss or protection. Screen-printing varnishing achieves better results, although it is often necessary to perform two shots to achieve a distinctly evident result. The surface roughness typical of uncoated papers may give rise to micro defects with plastic laminating caused by incomplete adhesion of the film to the substrate. Good results with major processing operations such as: cutting, die-cutting, scoring,
