TECHNICAL FEATURES

Ref. to roules/instrument unit of measure

Brightness - ISO 2470 (R457) - 104% ± 2

Relative Humidity 50% ± 5 rif. TAPPI 502-98

* Uncoated side

ECOLOGICAL FEATURES

the product is completely bio-degradable and recyclable. Symbol Card Highline is produced by special runs available upon request, and need a minimum lot of production. For all the technical features above mentioned, the paper mill provides only measurements before the embossing. The differences between the six embossing patterns, in terms of geometry, depth, direction along and/or against the grain direction, influences proportionally the final product

NOTE

SYMBOL CARD

Symbol Card is excellent for packaging, covers, postcards, brochures, promotional material, greeting cards and similar applications.

APPLICATIONS

Can be used without problems with the main printing systems: letterpress, offset, blind embossing, hot foil stamping, thermography and screen-printing. For offset printing, the characteristics of the coated side are comparable to our Symbol Freelifa Satin, and the uncoated side is designed to provide good printability, also with solid colours.

PRINTING SUGGESTIONS

Good results can be expected with all the main converting process: cutting, die-cutting, scoring, glueing, varnishing and plastic lamination.

CONVERTING SUGGESTIONS
